

Your Head In Wax By An Expert

The MATAN
diamond was esteemed
for its great healing
qualities

The Matan ranks as the largest genuine diamond of which there is any record. It was named after the Rajah of Matan in whose mining district it was discovered. The Bornean natives attributed miraculous healing qualities to this "holy" diamond, and believed that water in which the diamond was dipped if applied to a sick person would completely cure the ailment. The Dutch government offered large sums of money and ammunition grants for its possession but each offer was rejected. The Matan diamond now remains as the only royal remnant of a vanishing Eastern Empire.

CHAS. SCHWARTZ & SON "PERFECT DIAMONDS"
ARE HELD IN ESTEEM FOR THEIR RARE PERFECTION

Lady's Diamond Ring with
Certified
Perfect Dia-
mond **\$100**
Pay \$2.00 a Week

Certified Perfect Diamonds are famous for their unusual clearness and beauty. They are carefully selected by our diamond experts from the many diamonds presented for our buying consideration by leading diamond importers. Their high standard of excellence places Certified Perfect Diamonds in a class by themselves. Guaranteed by Chas. Schwartz & Son, they represent the maximum in diamond value.

**Quick! The Cough Syrup That
CLINGS TO THE COUGH ZONE**

**"AND IT CONTAINS
VITAMIN A"**

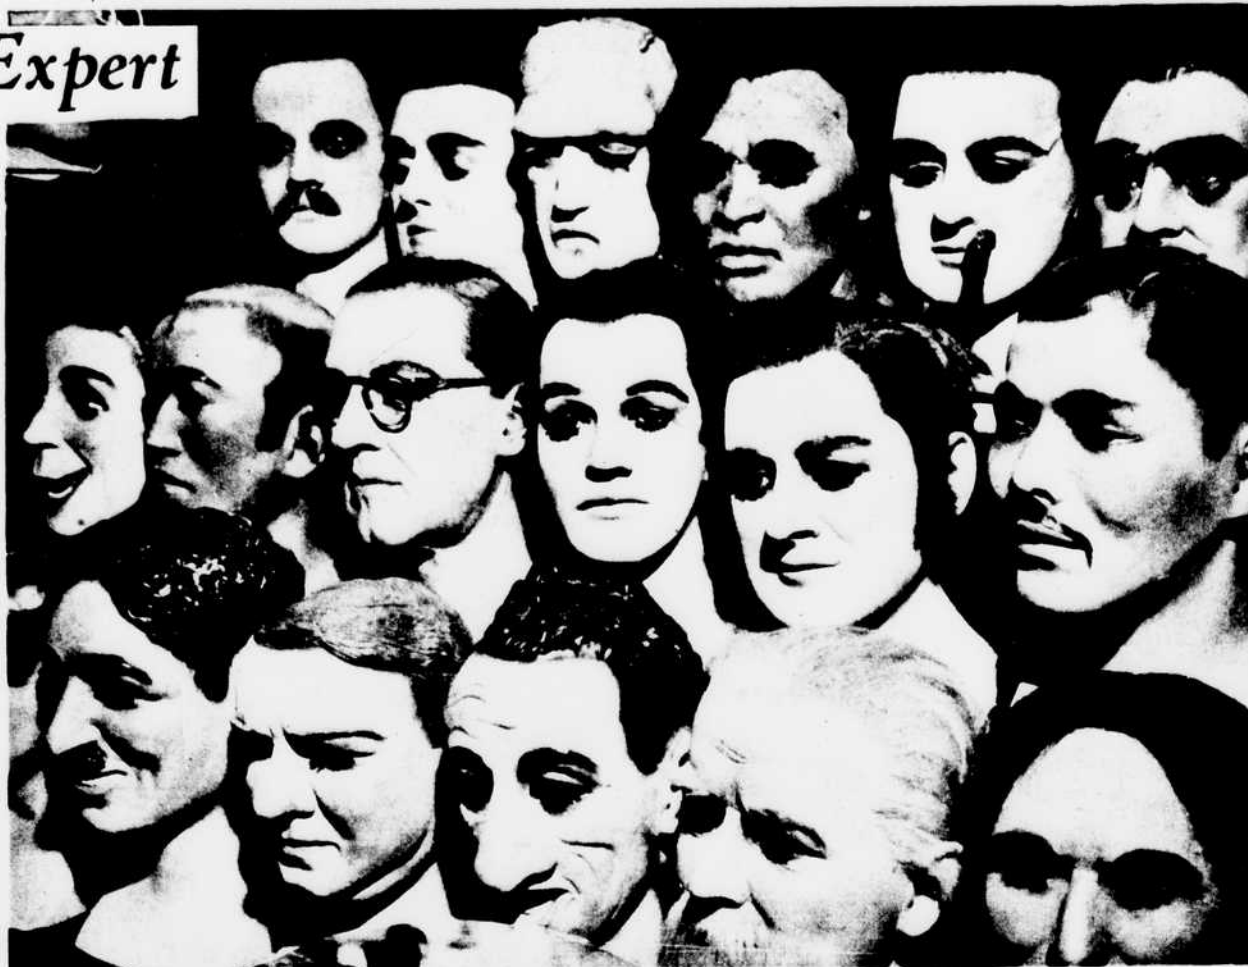

This vitamin raises the resistance of the mucous membranes of the nose and throat to cold and cough infections.

If there is anything that common sense dictates, it's this: a cough medicine should do its work where the cough is lodged... right in the throat. That's why Smith Brothers Cough Syrup is a thick, heavy syrup. It clings to the cough zone. There it does three things: 1) soothes sore membranes, 2) throws a protective film over the irritated area and 3) helps to loosen phlegm. 60¢.

**BIG 6 OZ. BOTTLE
ONLY 60¢**
Costs 1/4 to 1/2 less per dose

**SMITH
BROS.
COUGH SYRUP**

If you want to see yourself "done" as faithfully in three dimensions as those heads above, some of whom you'll no doubt recognize, there's a wax works out in Detroit that offers the chance. The process, we gather, isn't altogether pleasant, but it's perhaps less tedious than sitting for a portrait. And you get the benefit of the same artistry—for the expert wax worker has to know his colors and how to apply them to get his lifelike effects. He has to know anatomy, too, and even hairdressing. All those arts are combined in the individual likenesses that have become more than a sideline in this establishment that also produces wax figures for museums and store windows.

First the face is well plastered to get the cast for the wax head. The subject's face had been buttered and wax laid over the eyes before the plaster was applied. It dries hard in 10 minutes.

Then the hardened plaster is removed (right) and the cast, after considerable art work to "open" the eyes, is ready for the wax to be poured in to yield its facial reproduction.

And here the lady poses beside her wax double. This is merely the mask. Much remains to complete the lifelike effect it will have when the head is finished by the wax worker who knows his art.
